Handbook of Selected Statistics on Saskatchewan Trade

Saskatchewan

FOREWORD

The Handbook of Selected Statistics on Saskatchewan Trade has been compiled to present in one volume a detailed measure of Saskatchewan exports to the world. The Handbook is a compilation of Statistics Canada and provincial data on provincial exports laden and produced in Saskatchewan.

The Department of Trade and Investment corrected deficiencies in Statistics Canada's data, for the years up to and including 1984, which stemmed from the measurement of exports on a province of lading basis. Saskatchewan exports of raw materials such as cereal grains, oilseeds, uranium, and potash fertilizer (potassium chloride muriate) were not attributed to the province in which these exports originated. This meant that some exports originating in Saskatchewan were included with the exports from British Columbia and Ontario. To correct these statistics, provincial production and sales figures were substituted and allocated by country using Canadian trade flow patterns.

Statistics Canada has since changed its measurement of exports to reflect province of origin. The data for 1985 and 1986 reflect this change. Except for uranium statistics, which continue to be obtained from the Department of Energy and Mines, Saskatchewan export data reflect this new method. Uranium exports are an exception because the Statistics Canada data measure the exports of radioactive material comprised largely of uranium hexafluoride (UF_6) which is processed in Ontario. Provincial data reports exports of uranium oxide (U_3O_8) which Saskatchewan mines sell on a worldwide basis.
